<Project Name>
Business Architecture Document
Version <1.0>

[Note: The following template is provided for use with the Rational Unified Process. Text enclosed in square brackets and displayed in blue italics (style=InfoBlue) is included to provide guidance to the author and should be deleted before publishing the document. A paragraph entered following this style will automatically be set to normal (style=Body Text).]

[To customize automatic fields in Microsoft Word (which display a gray background when selected), select File>Properties and replace the Title, Subject and Company fields with the appropriate information for this document. After closing the dialog, automatic fields may be updated throughout the document by selecting Edit>Select All (or Ctrl-A) and pressing F9, or simply click on the field and press F9. This must be done separately for Headers and Footers. Alt-F9 will toggle between displaying the field names and the field contents. See Word help for more information on working with fields.]

6. Culture View 5

8. Domain View (optional) 5

9. Size and Performance Goals 5

10. Quality Goals 5
1. Introduction

[The introduction of the Business Architecture Document should provide an overview of the entire Business Architecture Document. It should include the purpose, scope, definitions, acronyms, abbreviations, references and overview of the Business Architecture Document.]

1.1 Purpose

This document provides a comprehensive architectural overview of the business, using a number of different architectural views to depict different aspects of the business. It is intended to capture and convey the significant architectural decisions which have been made on the business.

[This section defines the role or purpose of the Business Architecture Document, in the overall project documentation, and briefly describes the structure of the document. The specific audiences for the document should be identified, with an indication of how they are expected to use the document.]

1.2 Scope

[A brief description of what the Business Architecture Document applies to; what is affected or influenced by this document.]

1.3 Definitions, Acronyms and Abbreviations

[This subsection should provide the definitions of all terms, acronyms, and abbreviations required to interpret properly the Business Architecture Document. This information may be provided by reference to the project’s Business Glossary.]

1.4 References

[This subsection should provide a complete list of all documents referenced elsewhere in the Business Architecture Document. Each document should be identified by title, report number (if applicable), date, and publishing organization. Specifies the sources from which the references can be obtained. This information may be provided by reference to an appendix or to another document.]

1.5 Overview

[This subsection should describe what the rest of the Business Architecture Document contains and explain how the Business Architecture Document is organized.]

2. Architectural Representation

[This section describes what business architecture is for the current business, and how it is represented. Of the Business Process, Organization Structure, Culture, and Human Resource Aspects, it enumerates the views that are necessary, and for each view, explains what types of model elements it contains.]

3. Architectural Goals and Constraints

[This section describes the requirements and objectives that have some significant impact on the business architecture: use of a particular technology, character of geographic distribution. It also captures the special constraints that may apply: standards, development tools, team structure, culture, and so on.]

4. Business Process View

[This section lists business use cases or business scenarios from the business use-case model if they
represent some significant, central capability of the final business, or if they have a large architectural coverage - they exercise many architectural elements, or if they stress or illustrate a specific, delicate point of the business architecture.]

5. **Organization Structure View**  
(This section describes the architecturally significant parts of the business object model, such as its decomposition into organization units.)

5.1 **Business Use-Case Realizations**  
(This section illustrates how the organization actually works by giving a few selected business use-case (or scenario) realizations, and explains how the various business object model elements contribute to their functionality.)

6. **Culture View**  
(This section describes the cultural characteristics of the organization, as well as the mechanisms that are put in place to encourage those characteristics.)

7. **Human Resource Aspects View**  
(This section describes the mechanisms that are put in place to culture and develop the human resources of the organization.)

8. **Domain View (optional)**  
(This section describes key elements of a domain model for the organization.)

9. **Size and Performance Goals**  
(A description of the major dimensioning characteristics of the business that impact the business architecture, as well as the target performance constraints.)

10. **Quality Goals**  
(A description of how the business architecture contributes to all capabilities (other than functionality) of the business: extensibility, reliability, ability to growth, and so on.)
