

<Project Name> Test Guidelines

Version <1.0>

[Note: The following template is provided for use with the Rational Unified Process. Text enclosed in square brackets and displayed in blue italics (style=InfoBlue) is included to provide guidance to the author and should be deleted before publishing the document. A paragraph entered following this style will automatically be set to normal (style=Body Text).]

[To customize automatic fields in Microsoft Word (which display a gray background when selected), select File>Properties and replace the Title, Subject and Company fields with the appropriate information for this document. After closing the dialog, automatic fields may be updated throughout the document by selecting Edit>Select All (or Ctrl-A) and pressing F9, or simply click on the field and press F9. This must be done separately for Headers and Footers. Alt-F9 will toggle between displaying the field names and the field contents. See Word help for more information on working with fields.]

Test Guidelines

1. Introduction

*[The introduction of the **Test Guidelines** should provide an overview of the entire document. It should include the purpose, scope, definitions, acronyms, abbreviations, references, and overview of the **Test Guidelines**.]*

1.1 Purpose

*[Specify the purpose of the **Test Guidelines**.]*

1.2 Scope

*[A brief description of the scope of the **Test Guidelines**; what Project(s) it is associated with, and anything else that is affected or influenced by this document.]*

1.3 Definitions, Acronyms and Abbreviations

*[This subsection should provide the definitions of all terms, acronyms, and abbreviations required to properly interpret the **Test Guidelines**. This information may be provided by reference to the project Glossary.]*

1.4 References

*[This subsection should provide a complete list of all documents referenced elsewhere in the **Test Guidelines**. Each document should be identified by title, report number (if applicable), date, and publishing organization. Specify the sources from which the references can be obtained. This information may be provided by reference to an appendix or to another document.]*

1.5 Overview

*[This subsection should describe what the rest of the **Test Guidelines** contains and explain how the document is organized.]*

2. Goals of Testing

[A statement to identify why testing is performed and used by the organization.]

3. Testing Standards

[This section identifies and describes all guidelines and standards to be used in the planning, design, implementation, execution, and evaluation activities including:

- *Test Case standards: A statement identifying the types of test cases that should be developed for testing, such as valid, invalid, boundary, etc.*
- *Naming Convention: A description of how each kind of entity, such as test case and test procedure, should be named.*
- *Design Guidelines: A statement identifying test procedure and script modularity goals, for reuse and maintenance.*
- *Test Data standards: A statement of how data will be selected or created and restored to support testing.]*

4. Key Measures

[A definition of what kind of measures you will use to determine the progress of test activities (what type of defect counts are going to be used, how to measure successfully executed test cases).]

<Project Name>	Version: <1.0>
Test Guidelines	Date: <dd/mmm/yy>
<document identifier>	

5. Test Completion Criteria

[A statement identifying recommended completion and evaluation criteria.]

6. Defect Management Guidelines

[A statement identifying how defects will be managed.]

7. Change Management Criteria

[A statement identifying how test artifacts will be managed and maintained.]
